Rejuvenator

Meso-Lift Rejuvenator

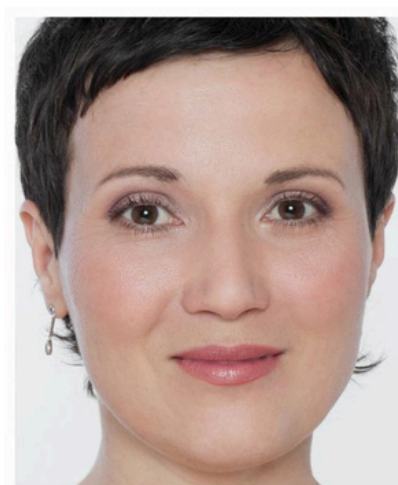

Mesotherapy is a medical technique which involves micro-injections of a unique combination of specialised ingredients into the mesoderm within a problematic area.

Many people are uncomfortable with the concept of multiple injections; therefore experts have sought ways to offer 'no-needle' alternatives. No-needle options aim to promote the penetration of active ingredients (like with mesotherapy) when applied topically using electrical currents to assist in transportation of these ingredients through the protective barriers of the skin. After extensive research on micro-current

facial stimulation, all the gathered experience was incorporated in the Meso-Lift Rejuvenator, a non-surgical face-lift machine, specifically designed to be used with the Willa Krause Skin Care range. The Meso-Lift Rejuvenator offers a pain-free option which is simple, safe, relaxing and much more affordable than traditional mesotherapy.

Juliette Armand (Skin booster) Chronos Therapy “Filling”

Chronos is a cosmetology breakthrough, for preventing and repairing the ravages of time, without using injectables.

Chronos meaning “Time”

Chronos therapy is a treatment that prevents and combats the marks of ageing of the skin.

Chronos therapy acts as a protective shield of the skin, protecting against three very severe enemies:

- . Lack of water
- . Biological ageing
- . Oxidative deterioration or damage
- . These enemies are caused by the environment

It is immediately activated whenever the delicate biological balance of the skin is disturbed or compromised.

Chronos consists of cutting edge 4D technology

Four-dimensional technology to combat ageing, using for active systems:

1. Peeling System: exfoliating action to remove dead skin cells and a protective action to keep water balance of the tiered skin in its ideal level. Combined synergy of Glycolic ad Salicylic acid with Urea which improves the skin's ability to grab and hold water in the dermis and Kera-Plast which a derivative of the bark of willow trees, reduces subcutaneous capillaries (couprose). This combination improves the skin's thickness, collagen production, educes wrinkles, roughness and imparts uniformity.
2. Hydra System: Enhances the skin's water reserves and protects it against tans-epidermal water loss. Main ingredients: Leader of hydration, Hyaluronic acid, which as we know is a component to the structural element of connective tissue has the ability of retaining upn to 1000 times its weight in water therefore hydrating the skin gradually. The hydra system contains two types of Hyaluronic acid, HMW and LMW.
3. Anti-ageing System: Stimulates collagen and elastin, as well as the function of fibroblasts in the skin Ideal for facial rejuvenation. Peptides play a roll n the message transmission between cells. Clinical trails have been performed to record their high efficacy in the anti-ageing action. CL Biopeptides have show a 382% increase in collagen production and a 146% increase in “GAGS” synthesis.
4. Antioxidant System: Contributes to the antioxidant fortification of the skin against environmental pollutants, solar radiation, preventing premature ageing and photoaging. Alpha Lipoic Acid (ALA) is known as the most powerful antioxidant of metabolism worldwide.It is 400 time more potent the Vit E & C. ALA is deeply moisturizing and simulate fibroblast function to the body as well as collagen and elastin.

PRICE LIST

Juliette Armand (Skin booster) Chronos Therapy “Filling”

Chronos Therapy is recommended for:

- . Age spots
- . It acts as the skin’s protective barrier
- . Provides deep skin hydration
- . A potent antioxidant
- . Stimulates collagen & elastin production and enhances fibroblast function by the body itself.

In-Salon Chronos treatment is a step-by-step treatment, offering massage techniques and a very hands-on facial experience. Chronos can be incorporated with microneedling, alternating between

Juliette Armand (Skin booster) Thavma Therapy “Botox”

Thavma is the latest “miracle” of cosmetology, which “ERASES” wrinkles of expression, without the use of lacet or injectables.

Thavma manages to restore skins firmness with proven effectiveness.

Thavma action is based on:

Effectox technology, which inhibits the mechanism that is responsible for the creation of expression lines and wrinkles. But there is more...it also offers protection from the main types of aging, (biological & photo-ageing)

About Effectox “technology

Expression lines and wrinkles are formed on the face, (eye contour, forehead, between eyebrows, around the mouth and on the chin), because of repeated and constant movements and use of facial muscles.This is a biological process in the fibroblasts.

A protein (snare complex) is destabilized

Regulates the flow of calcium and sodium to fibroblast’s

Reduces the stimuli for muscle contractions i.e, fewer facial expression contractions.

So therefore, Thavma is recommended for

The treatment of expression lines and wrinkles, photo-ageing, and skin loosening.

In-Salon Thavma treatment is a step-by-step treatment, offering massage techniques and a ery hands on facial experience.

Thavma can be incorporated with microneedling, alternating between treatments, and sold in packages to get the full benefit of the treatment

Thavma treatments x 4

Carboxytherapy

Experience the rejuvenating power of our Carboxy CO₂ Aesthetics Facial — a treatment designed to boost collagen, brighten the skin, reduce wrinkles, and deliver visible anti-aging results for a radiant, youthful glow. What It Does

This brightening facial increases oxygen and circulation within the skin, enhancing elasticity and creating a plumper, smoother, and more luminous appearance. It also stimulates collagen production for powerful anti-aging effects — improving firmness, evening skin tone, reducing fine lines, and restoring a healthy, hydrated complexion.

The result? Skin that looks fresh, firm, and beautifully radiant.

Why It Works

Dermal Aesthetics Carboxy Therapy delivers fast, visible results — even after just one session. The treatment infuses the hypodermis with carbon dioxide, triggering increased blood flow to the skin’s muscle and fat tissues. Our needle-free technology enhances the skin’s metabolism and natural oxygen production, providing deep hydration and promoting a rejuvenated, youthful complexion.

How the Treatment Works

A special Carboxy gel or mask is applied to the skin, releasing controlled amounts of carbon dioxide. In response, the body sends a surge of oxygen to the treated area, improving circulation and re-energizing skin cells.

This oxygen boost:

- Stimulates collagen production
- Speeds up cell renewal
- Brightens dull, tired skin
- Reduces pigmentation, fine lines, and wrinkles

The result is firmer, smoother, and more radiant-looking skin.

When to Expect Results

Many clients notice an immediate improvement in skin brightness and texture right after the first Carboxy Facial. Within 24–48 hours, the complexion appears fresher, smoother, and more luminous.

Deeper benefits — such as collagen regeneration, wrinkle reduction, and pigmentation correction — develop gradually over 3–5 sessions, as the skin continues to renew and repair itself.

In Summary

You’ll enjoy an instant glow after one treatment, but for the most visible and long-lasting transformation, a full course of sessions is recommended.

This treatment can be done twice a month combining with needeling (nano) or (36 needle)

KRX LAZER PEEL

LaZer Peel is a revolutionary, professionally engineered skin peeling product that mimics how laser works on the skin for whitening.
It is a blend of multiple acids, And Vitamin Complex that contribute to even, satisfying and whitened skin.
With a lower pH level compared to our existing Peels, skin may experience mild to medium shedding and recovery, and sun protection and proper care is highly recommended to achieve best results.

LaZer Peel works by using exfoliating acids, and whitening actives such as Tranexamic acid to target exfoliation and whitening in 1 session same as how the Laser treatments work.

Price Face & Neck with led light for 10 min @ R650

Price face & neck and decollate led light 10min @ R850

KRX V-Tox Higher Power Lift Mask

V-Tox Higher Power Lift Mask is a stronger and better reformulation
V-Tox Higher Power Lift Mask intensely lifts, tightens, and firms the skin.
It visibly and quickly provides skin rejuvenation and skin improvement.
The unique aspect of our V- Tox Mask is its transforming effect during application.
As the mask dries, it creates a tight, and firming sensation that then releases to a “cracked” effect.
This sensation and appearance is the effect of the water evaporation while skin absorbs the nutrients.

The skin’s problem also can be seen underneath the mask by noticing the reaction when the water evaporates and the mask dry.

When the mask is:

Smooth – the skin underneath is more normal.

Bubbly/Bumpy – Lack of collagen, starts to sag, wrinkle

Dry/Cracking – Dehydrated

A newer, better, higher power lifting mask that intensely lifts, tightens, and firms the skin. It provides immediate effect and a long-lasting treatment to reverse skin ageing.

With 6 types of collagen

11 peptides

10 fruit/leaf extract

Niacinamide & bioflavonoids

ADD ON

It acts as a topical filler 100% Hyaluronic Acid!

The nano particles of hyaluronic penetrates the skin, targeting the problematic areas of the face and watch how fast skin absorbs it showing almost immediate results.

It acts by filling the lines and wrinkles and sunken areas without needing any needles.

Just sprinkle the powder into areas like forehead, smile lines, bunny lines, crow’s feet and even undereye, Massage the powder, or even use nano or microneedles, and see the instant difference, instant plumped, hydrated, glowing skin.

It can be applied during a microneedling or even bb glow treatment, just apply the powder before the serums, and that’s it!

This treatment can be used every week, until needed.

Formulated with 3 molecular size of Hyaluronic acid to treat different skin layer, to boost and intensify every procedure done, and even acts as a non injectable filler to wrinkles and sunken undereye.

High Molecular weight- forms an outer layer of moisturisation as it stays on the top most layer of the skin.

Middle Molecular Weight – This goes deeper to support a longer lasting hydration.

Low Molecular Weight – This goes the deepest and ensure water is stored in the skin tissues resulting to plumpier, firmier, glowing and healthy skin

KRX AESTHETIS GREEN SEA PEEL

Green Sea Peel

A Natural Alternative to Chemical Peels

Green Sea Peel is a revolutionary skin resurfacing treatment that offers a natural, acid-free alternative to traditional chemical peels. Unlike peels that rely on low pH levels and chemical exfoliants, this treatment works by mechanically stimulating the skin to renew itself—without the use of any acids.

How It Works

The key component of Green Sea Peel is its marine-derived powder, sustainably harvested from the ocean. Once applied, the micro-needling-like effect of the marine actives gently removes the superficial layer of dead skin cells while stimulating the skin's natural regeneration process.

This unique mechanical stimulation:

- Encourages cell turnover
- Helps detoxify the skin
- Promotes the formation of new, healthy skin cells

Activator Benefits

To support the peeling process and ensure optimal skin health, the activator contains a powerful blend of skin-loving ingredients:

- Hyaluronic Acid – Deeply hydrates and plumps the skin
- Beta-Glucan – Soothes and calms inflammation
- Allantoin – Aids in healing and skin regeneration

This dual-phase system delivers both exfoliation and nourishment, leaving the skin smoother, brighter, and revitalized.

Known Globally As:

This method is recognized in other regions under various names, including:

- Algae Peel
- Bio Peel
- Bio-Microneedling

However, Green Sea Peel stands apart with its advanced formulation—featuring a unique combination of marine actives that go beyond traditional methods to deliver superior results.

Key Ingredients

Activator Phase:

Aqua, Glycerine, Betaine, Beta-Glucan, Sodium Hyaluronate (Hyaluronic Acid), Allantoin, Propylene Glycol

Powder Phase:

Durvillea Antarctica Extract, Hydrolyzed Sea Sponge, Algae Extract

The KRX Green Sea Peel is a natural, acid-free resurfacing treatment that offers a wide range of benefits for different skin concerns. It uses marine-based micro-particles to mechanically exfoliate the skin while stimulating natural cell turnover and regeneration.

KRX AESTHETIS GREEN SEA PEEL

What the KRX Green Sea Peel Helps With:

1. Acne & Congestion
 - Deep exfoliation helps unclog pores
 - Reduces blackheads, whiteheads, and breakouts
 - Calms inflammation and reduces post-acne marks
2. Hyperpigmentation & Melasma
 - Accelerates removal of pigmented surface cells
 - Stimulates cell renewal to brighten skin tone over time
 - Safe for post-inflammatory pigmentation (PIH)
3. Aging & Fine Lines
 - Stimulates collagen and elastin production
 - Smooths out fine lines and rough texture
 - Improves skin firmness and elasticity
4. Dull & Tired Skin
 - Promotes faster skin renewal for a glowing, radiant complexion
 - Improves skin tone and texture
5. Scarring (including Acne Scars)
 - Mechanical stimulation encourages skin regeneration
 - Helps fade mild to moderate scars over a series of treatments
6. Enlarged Pores
 - Helps tighten pores by removing built-up dead skin and excess oil
 - Stimulates deeper skin layers to promote firmness
7. Sensitive or Thin Skin
 - A great alternative for clients who can't tolerate acid peels
 - Works without altering the skin's pH, reducing risk of irritation

Ideal For:

- Oily/acne-prone skin
- Mature or aging skin
- Uneven skin tone

Product

PRICE LIST

KRX AESTHETIS GREEN SEA PEEL

KRX Green Sea Peel – Not Recommended For:

- 1. Active Skin Infections or Open Wounds
 - Avoid on areas with open acne lesions, cold sores, or bacterial infections to prevent spreading or irritation.
- 2. Extremely Sensitive or Reactive Skin
 - Clients with rosacea, eczema, dermatitis, or hypersensitivity may react negatively to the micro-needling effect of the marine spicules.
- 3. Pregnant or Breastfeeding Clients
 - Though natural, the deep skin stimulation may not be suitable during pregnancy or lactation unless cleared by a physician.
- 4. Recent Use of Harsh Actives
 - Avoid if the client is using or has recently used:
 - Retinoids (Retin-A, Tretinoin, etc.)
 - Strong AHAs/BHAs
 - Accutane (isotretinoin) within the past 6 months
- 5. Recent Cosmetic Procedures
 - Wait at least:
 - 2 weeks after waxing, microdermabrasion, or light peels
 - 4 weeks after laser treatments or microneedling
 - 6 months after deep chemical peels or aggressive resurfacing
- 6. Very Thin or Damaged Skin Barrier
 - If the skin shows signs of barrier impairment (redness, flaking, stinging), it's best to rebuild the barrier first with calming treatments.
- 7. Allergy to Marine Extracts or Sponges
 - Not recommended for clients with known allergies to algae, marine extracts, or sea sponge-derived ingredients. Allergy to seafood and shellfish.
